Web / Mobile Apps Development

Web / Mobile apps development for innovative businesses and disruptive startups

E-Signature has been at the frontier of Web apps development in North America, Australia, Canada, London since 2008, developing apps that are intuitive, visually appealing and technically challenging for leading businesses and start-ups.

Frontend technologies

Our Value

You deserve nothing short of great service —
that's why we hold our work the highest possible standards.

We have the creative horsepower, technical expertise and project management abilities to thrill your stakeholders and wow your end users. We offer the type of value that comes with real know-how.

Our success is measured by your success

We make your business better because you are at the heart of what we do.

A customer is the most important visitor on our premises, they are not dependent on us. We are dependent on them. They are not an interruption in our work. They are the purpose of it. They are not an outsider in our business. They are part of it. We are not doing them a favour by serving them. They are doing us a favour by giving us an opportunity to do so.

Process

Development Method / Process Applicability

Product development where a software company is developing a small or medium-sized product for sale.

Custom system development within an organization, where there is a clear commitment from the customer to become involved in the development process and where there are not a lot of external rules and regulations that affect the software.

Because of their focus on small, tightly-integrated teams, there are problems in scaling agile methods to large systems.

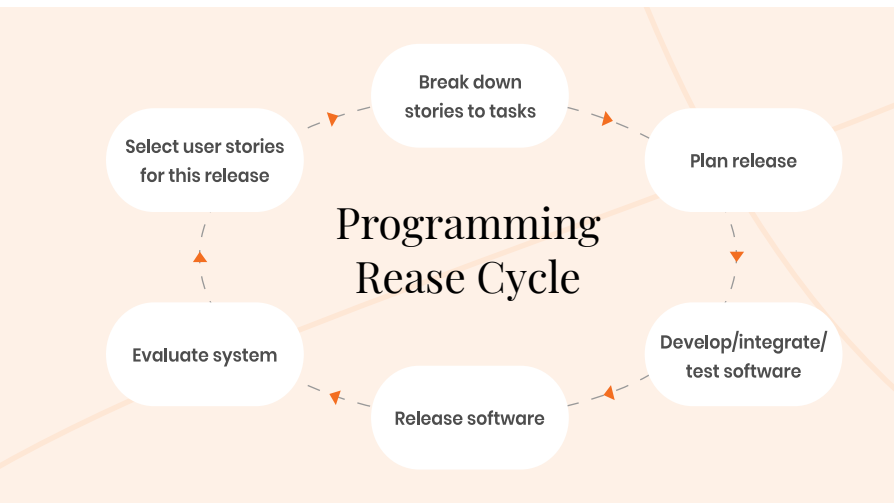

Scrum Process

We will follow Scrum Development Method with Agile Process.

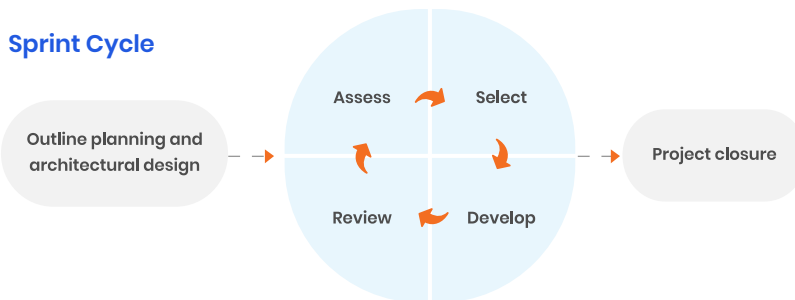

The Scrum approach is a general agile method but its focus is on managing iterative development rather than specific agile practices.

There are three phases in Scrum.

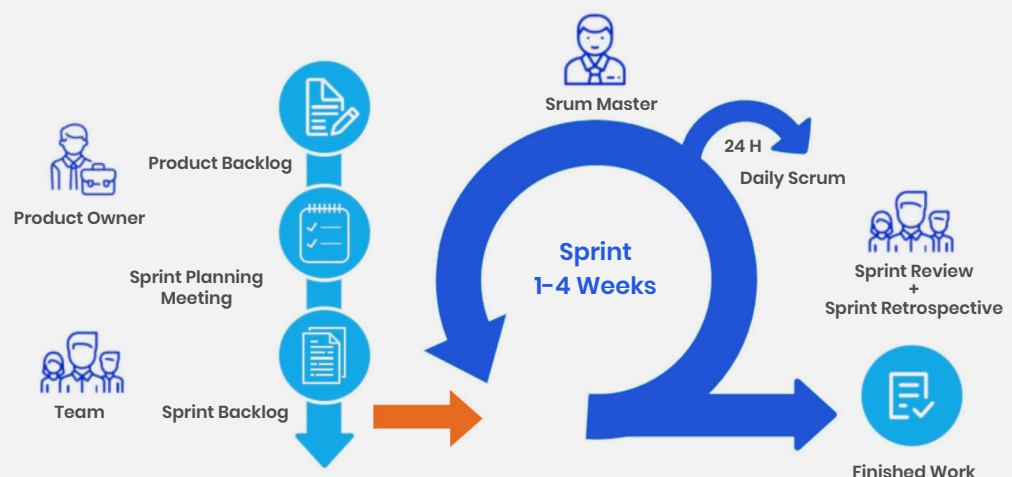

- The initial phase is an outline planning phase where you establish the general objectives for the project and design the software architecture.
- This is followed by a series of sprint cycles, where each cycle develops an increment of the system.
- The project closure phase wraps up the project, completes required documentation such as system help frames and user manuals and assesses the lessons learned from the project.

Sprint Cycle

Agile Scrum Process

Services

Services to grow your business

We enhance user experiences and grow brands by developing conversion-focused mobile applications and web development.

Mobile Application

Best in class app development since 2008. Enterprise Level of expertise on mobile apps development (iOS and Android). The iOS platform is often the first choice for many mobile app development projects. We have been developing best in class native iOS apps since Apple made the development kit available to mobile developers. Our native and React Native apps are developed with attention to the details and tested across multiple devices to ensure optimum performance and user experience.

Web Application

We deliver services around a growth first mentality Web Application Development and User Experience Design Development. The modern web has evolved to become synonymous with responsiveness, interactivity, and elegance.

In order to fully address these vital concerns when building a web app, a full understanding of the most relevant technologies, such as Python/Django, RoR, PHP, and .NET, is required. Our website development team has the kind of expertise in responsive frameworks, responsive imagery and typography, icon fonts, and CSS preprocessors that only years of industry experience can provide.

Staff Leasing

Upto 70% cost reduction without any compromization in quality of staff. Through our Offshore Staff Leasing services, you can establish your own team, who work for you exclusively.

We are now running multiple Offshore Development Teams (ODT) for our clients as an extension of IT departments of both end user companies and professional software companies, outsourcing (part of) their software production process.

Our offshore staffing model is the most cost-effective, efficient, and transparent outsourcing solution. E-Signature provides customized staff leasing services from a carefully handpicked pool of skilled college educated professionals. Then we provide the infrastructure, facilities and tools needed in your operation while you provide the directives to your new virtual team.

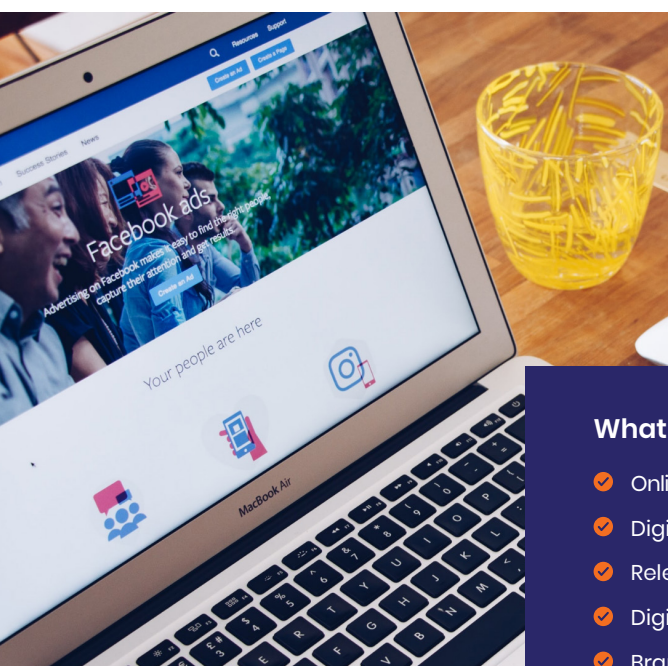

Cut Costs, Increase Productivity, we use HUBSTAFF for tracking all the activities of the staff of all the leased staff.

Strategic Digital Marketing

Result Focused Search Engine & Social Media Optimization Industry Level Expertise

As a valued customer you receive a dedicated Account Manager who will guide you through the various options and ideas that can help your business expand. So many of our clients understand the value we provide to their business and because of this have been with us for many years.

Social Media Marketing is the technique of increasing your business and website traffic through the various social media websites like Facebook, Twitter, YouTube, and Google+, plus many more. Engaging with your potential market and customers is now vital to the success of any business on the Internet.

Branding, Web Design

Using technology to connect business entities with its consumers.

Setbots is a chatbot that is AI-Powered, built for business entities to help them connect with their clients through different messaging platforms. Its functionalities include interacting with prospective clients similar to that of human beings. Built with a view to communicating with prospective buyers (customers) for all kinds of establishments.

Mobile App Design

Using technology for a car-sharing business

A gateway to a tenant-based car sharing.

Rent A Car Club is a car-sharing business based in Bangkok, Thailand. What makes Rent a car club stand out of the crowd, from other car rentals. It is based on the sharing module, which helps in deducting the unnecessary cost. It is similar to how Airbnb avoids its accommodation costs. Furthermore, the business is growing steadily, with high aims and hopes. Rent A Car Club has arranged insurance of the vehicles with Viriyah Insurance while providing the service. Similarly, Rent A Car Club has helped in strengthening the tourism sector in Thailand.

Branding, Web Design

Connecting business through a Digitized Marketing Tool

Connecting business through a Digitized Marketing Tool.

vCard Global is an ultimate marketing tool that helps in transforming the way we connect with others and grow businesses through the diaphanous feature. It is a Digital Business card which features mobile webpage, resume, event calendars and much more. Similarly, it has been helping clients build a long lasting relationship with their contact database or so called clients.

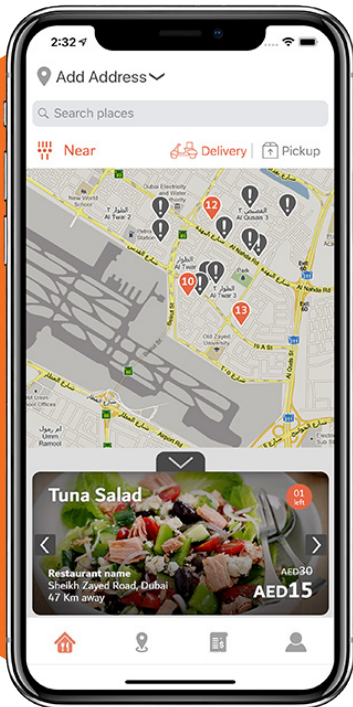

Branding, Web Design

Improving the education reach by using technology

InstAgents is a web-based education platform for Students, Agencies and Institutions. It also consists of an AWS cloud-based Customer Relation Management (CRM) software for Agencies for easy office management. Similarly, with the Customer Relation Management software the Agencies can manage and automate their business entities easily.

Mobile App Design

A digital food platform that offers a scrumptious meal with 50% discount

A revolutionary iOS app integrating directly into menus of restaurants

KeepEat App is one of the renowned business in all of Dubai and the middle east. It was created to alleviate the environmental problem by preventing food wastage. The business is based on the partnership between Emirati and Swedish entrepreneurs. KeepEat is committed to making a positive contribution to the environment by preventing the food from being wasted uselessly. With KeepEat App, the user of this app is able to get 50% discount on all food items and more.

هيئة كهرباء ومياه دبي
Dubai Electricity & Water Authority

Mobile App Design

Dubai Electricity & Water Authority

Built for the people of Dubai

Dewa also known as the Dubai Electric and Water Authority is the governmental website of the Dubai government. The website has been built with extensive security.

With Dewa, we had to work with the previous codes of the former company that were in charge of designing the website. Although, there was a communication gap with the former company. We had to first come up with a plan and understand the previous coding language. However, we concluded the project with little to no communication.

Testimonials

Trusted client section with testimonials

The Company and team did a great job and were flexible with my time. Very responsive and most bugs were fixed immediately. We are in the process of engaging them again and again on our all projects of company.

Carlos Yong
